English

Tamil

Kannada

PROFILE

As a dedicated and versatile Full-Stack Developer, I bring a robust understanding of both front-end and back-end development to create dynamic and responsive web applications. My expertise lies in leveraging cutting-edge technologies to design, develop, and maintain scalable and efficient web solutions. With a strong foundation in programming languages and a passion for continuous learning, I strive to deliver high-quality code and seamless user experiences.

PROJECTS

- **Weather detection website built using HTML, CSS and JS**

This is the website developed for detecting the current climate condition of cities all over the world by using api of 'OpenWeathermap'.

- **Employee Management System built using Python and SQLite3**

This is management system for maintaining the Employee details by importing 'tkinter' interface.

- **Restaurant website built using Python Django.**

Project developed to shows my Fullstack Development skills where I used to built by using HTML,CSS,JS,Python-Django

INTERNSHIP

My **web development** internship at **Pantech Learning** provided a valuable opportunity for me to enhance my skills and knowledge. I had the chance to delve into various aspects of web development, including **frontend developer** responsive design, which greatly enriched my learning experience and prepared me for a career in web development at the duration of one month in the year of 2023 - july.

CERTIFICATES

- Python programming in Guvi.
- Javascript Programming in Guvi.
- Web Development Intern certification in PanTech E-Learning.
